By obtaining a United States Environmental Protection Agency (EPA) Identification (ID) Number, you have notified EPA of your planned hazardous waste activities that are regulated under the Resource Conservation and Recovery Act (RCRA) Subtitle C Regulations. EPA has updated the information for your RCRA Site based on the EPA Form 8700-12, Notification of RCRA Subtitle C Activity, which was received on **04/27/2010**. Your EPA ID number (also referred to as RCRA ID Number) below is specific to the location indicated on the RCRA Site Location, and cannot be used at, or transferred to another location.

EPA (RCRA) ID #: CAT080011679
RCRA Site Name: DYNEGY OAKLAND LLC
RCRA Site Location: 50 MARTIN LUTHER KING JR WAY

OAKLAND, CA 94607

The EPA ID Number is to be used on transport manifests and any other hazardous waste management documentation required under the RCRA Subtitle C Regulations.

EPA has listed your hazardous waste activities status as:

Large Quantity Generator

Your EPA ID Number does not expire. However, if any of the information required in the form changes, (e.g. RCRA Site Name, hazardous waste activity status, contact information, etc.), you may be required to notify EPA by resubmitting a Form 8700-12 (see the instructions accompanying Form 8700-12 at <http://www.epa.gov/osw/inforesources/data/form8700/8700-12.pdf>). If you plan to cease or have ceased operation at the RCRA Site Location, you must notify EPA as well. For this, you could send a letter to EPA requesting to inactivate the EPA ID Number. A letter will be sent to the contact person indicating the change(s) based on the submitted documentation.

Please keep in mind that if you have the hazardous waste activity status of a "Large Quantity Generator", there is a required Biennial Reporting that must be filed with your appropriate state or region. For more information, please visit <http://www.epa.gov/epawaste/inforesources/data/form8700/contact.pdf> to find the contacts for States and EPA Regions. If you have any RCRA Notification (EPA ID Number) questions, please call 415-495-8895. This RCRA Notification service telephone line is operated by EPA Region 9's Contractor, Tetra Tech EM, Inc.

Dear Mr. Wilson:

Part A Hazardous Waste Permit Application
for Oakland Power Plant
(EPA ID No. CAT080011679)

We have reviewed the Part A "Hazardous Waste Permit Application" (Forms 1 and 3 of the Consolidated Permits Program) for the Oakland Power Plant (EPA ID No. CAT080011679) which was returned with your letter dated June 10, 1981. PG&E had previously filed this application with the United States Environmental Protection Agency (EPA) on November 19, 1980, in compliance with the final regulations promulgated by EPA on May 19, 1980, and July 16, 1980, pursuant to Sections 3001-3006 and 3010 of the Resource Conservation and Recovery Act (RCRA).

Subsequent amendments to the Hazardous Waste Management System regulations published on November 17, 1980, (Federal Register Vol. 45, No. 223, PP. 76074-76083) exempt certain wastewater treatment units and elementary neutralization units from the requirements of 40 C.F.R. Parts 122, 260, 264 and 265.

The hazardous waste treatment system at the Oakland Power Plant consists of a tank and a chemical addition system, and is used in neutralizing wastewater which exhibits only the corrosivity characteristic pursuant to 40 C.F.R. 261.22. After the treatment, the wastewater is discharged to the Oakland estuary in accordance with Section 402 of the Clean Water Act (the National Pollutant Discharge Elimination System NPDES permit Number CA0028339).
